

## Cleanroom

➤	Shoe sole cleaning machine efficiently cleans your shoe soles from any kind of dirt.
➤	Circulating brush belts running in counter direction clean the shoe soles and transfer dirt to the drawer of the machine where the belts are cleaned before returning to the surface.
➤	It is quite safe and comfortably to step over the surface regardless of the transverse rotating brushes.
➤	The machine efficiently cleans any shoe profile by applying pressure to the sole of the shoe.
➤	Debris collected remains in the machine and is not carried into the production areas.
➤	Standard finished brilliant also available in stainless steel.
