

## Contamination Control

➤	We plan the lay-out of clean entrances and can fall back on 15 years experience and a global knowledge of the market.
➤	We design hygiene entrances with different components adapting them to your individual needs.
➤	Shoe sole cleaning machines with vacuum system and filter unit
➤	Shoe sole sanitizer and shoe sole cleaning machine installed upfloor. Flexible installation for instant use.
➤	Wheel cleaning machines
➤	Preventing contamination caused by wheels of carts, fork- lifts and industrial vehicles.
➤	Helping to keep industrial areas free from contamination.
➤	Silent brush belts running in counter direction are cleaning shoe soles efficiently and safely.
➤	A special spring system underneath each brush-belt adapts itself to the individual user's weight.
➤	The same system cleans wheels of industrial vehicles quickly and effectively.

**Jeticelaner Premium is available in various size adapting to your needs.**
