

Environmental control

The self- contained air shower cabin stricly separates a grey- sector from a white- sector.

| | |
|---|--|
| ➤ | The compact air shower system comes ready for use with high- pressure- fan and filter systems. |
| ➤ | To start- up simply plug in and the air shower cabin is ready for use. |
| ➤ | The air shower cabin is equipped with an air jet system which blows dirt particles from clothing and absorbs them in a preliminary-filter. |
| ➤ | The air is then pressed through a HEPA filter where it is purified. |
| ➤ | The doors of the cabin have a hermetic sealing and an individualized i.e. tailor- made door - lock- control program. |
| ➤ | The cabin is an one-person chamber. this reduces the risk of cross-contamination. |
| ➤ | As a "special" option for air shower cabins we offer the shoe sole cleaning system JETCLEANER integrated in the bottom. |
| ➤ | Also available in coated steel. |
