SPOKESHAVES

Description

The spokeshave is a handy shaping tool useful on small curves, furniture legs etc; and provides a smooth plane-like finish. The wide range of spokeshaves caters for every requirement and is produced in two different types,

(a) With flat face for use on convex curves.

(b) With round face for use on concave curves.

ADJUSTABLE IRON PLANES

Planes are made in a comprehensive range of patterns and sizes suitable for different purposes. They embody many notable improvements and are produced with great care and accuracy.

The cut iron is hardened and tempered under scientific control ensuring accuracy and uniformity. It is precision ground all over, and is tested and guaranteed to be the right temper.

The parts for adjusting the cut iron accurately made to give very fine adjustment.

The handle and knob are of selected hardwood/ high quality plastic and are fastened to the body by steel studs with steel cap nuts.
